

Chapter 2

About the Python language

Main takeaways of this chapter

- ★ Python is an old but very popular programming language, used by the most successful companies in the world (Netflix, Facebook, Google, etc.).
- ★ Python is multi-platform, you can use it on your Raspberry Pi but also on any device.
- ★ Everything on Raspberry Pi OS is preinstalled for Python, so you can use it easily.

Questions

- What are the origins of the Python language?
- What is Python used for?
- Why is Python preinstalled on Raspberry Pi?
