

Scope Change Requests

Identify whether the following change requests could be in scope for the hospital scheduling project or should be out of scope based on the scheduling project objectives:

- Redesign the admission process to include the option to schedule a procedure.
- Add a feature to find patients across consortium hospitals.
- Add a feature to search payments across consortium hospitals.
- Add a feature to search for a procedure room available during multiple time slots.
- Update the scheduling/accounting data exchange to include procedure charge code.
- Add cross-training for the new scheduling system and cancer ward scheduling system.
- Update the new scheduling/cancer ward scheduling data exchange to include procedure charge code
- Add a selection feature to financial measures and service statistics reports so reports can cover a specific scheduling system or all scheduling systems.
