

# THE PANOS CUBE ACTIONS

For Photoshop® CS® and higher

© 2006 - All rights reserved

## 1. INSTALLING IN PHOTOSHOP

Please unzip the actions in your hard disk. To find out how to install and run these .atn files in Photoshop, please follow the instructions of this tutorial on my site:

[http://www.panosfx.com/index.php?option=com\\_content&task=view&id=46&Itemid=29](http://www.panosfx.com/index.php?option=com_content&task=view&id=46&Itemid=29)

## 2. THE ACTIONS OF THE SET

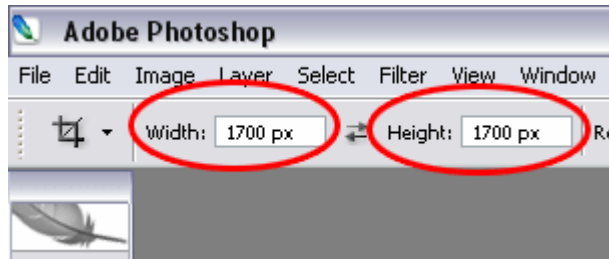

The zip file contains 2 action sets:

- The first set (**Panos cube\_1 IMAGE**) lets you create 9 different cubes, using 1 image of your choice.
- The second set (**Panos cube\_3 IMAGES**) lets you create 9 different cubes, using 3 images of your choice. All the images must have the **SAME** size.

In total there are 18 different cube effects! Just follow the instructions given while the actions run.

### 3. CROPPING THE IMAGES IN ADVANCE

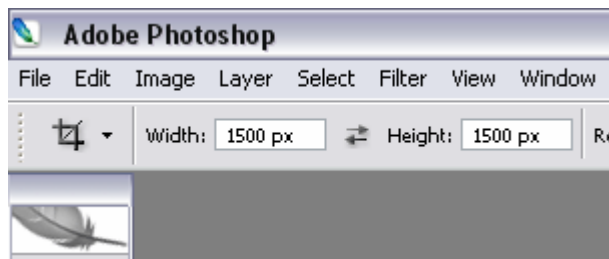

In order to produce a nice cube, the original images used need to be square. You can use Photoshop's **crop** tool to crop to square proportions. Press **C**; type in the final image dimensions (in pixels) in both W/H fields, in the crop tool bar:

Drag with your mouse and double click to crop.

No matter whether you use a smaller or a bigger image; the actions will produce a nice cubic effect. While the actions run you can tweak the styles parameters to suit your images.

The default styles applied are optimized for images of **1500 x 1500** pixels. If you want to crop an image to these dimensions, press **C**, type "1500 px" in the Width & Height fields on the crop tool bar at the top:

Hold down the **SHIFT** key and crop to preference. Save the images and then run the actions.

### 4. SUPPORT

Thanks for purchasing the actions. If you need any kind of assistance, please contact me at: [Panos@PanosFX.com](mailto:Panos@PanosFX.com)

I'll be happy to reply to you at the earliest convenience.

Kind regards

Panos Efstathiadis
