1-Click Actions Volume 3
Portrait Retouching & Portrait Effects

One of the most common tasks with PhotoShop is portrait retouching—no matter the age of the model most images can be improved with gentle retouching.

1 Click Actions Volume 3 comprises 2 action sets specifically designed for portraiture.
The first set makes common retouching tasks (skin, teeth, eyes etc) as easy as a 1Click action followed by "painting" the required areas with a white brush. The strength of the action is easily adjusted and often the complete face retouching process takes just a few minutes.

The actions include a quick boost which gives an immediate improvement to most portraits with a single click. This action is especially useful run in batch mode to give a quick fix to a series of images.

The "SkinClear" actions are provided in four standard strengths plus a "heavy duty" version. There is also the "frecklebomb" action to reduce or remove the appearance of freckles.

Running the QuickBoost action enhances skin tone and contrast with a single click (the sample above is at 50% strength.

To whiten teeth whilst still retaining the natural look and texture run the "ToothFairy" action and simple paint over the teeth. No need for complex masking.
The "whiteness" is easily adjustable and it takes only minutes to complete the task.

Actions are included to whiten the eyes and darken the pupils as well as sharpening and adding contrast and tone to the iris. Again there is no complex masking to undertake—simply run the required action and paint over the relevant areas.

It literally takes just a few minutes to retouch a portrait using the actions provided. Any errors you might make are easily removed (by painting in black rather than white). You can also adjust the opacity of the adjustment layers to increase or decrease the strength of your retouching.

Portrait Effects

The second set of actions included in this volume are complete 1-Click portrait effects rather than retouching tools. The full list of actions is as follows:
CopperGlow
ElectricBlue
RedDevil
Firelight
PorcelainSkin
MisytBlue
MistyBlue (Grainy)
MistySepia
MistySepia (Grainy)

All these effects are achieved with a single click.

PorcelainSkin

MistyBlue

CopperGlow

Any additions to the Portrait Effects (or any other 1click volume) are free of charge to existing users,
