Installation:
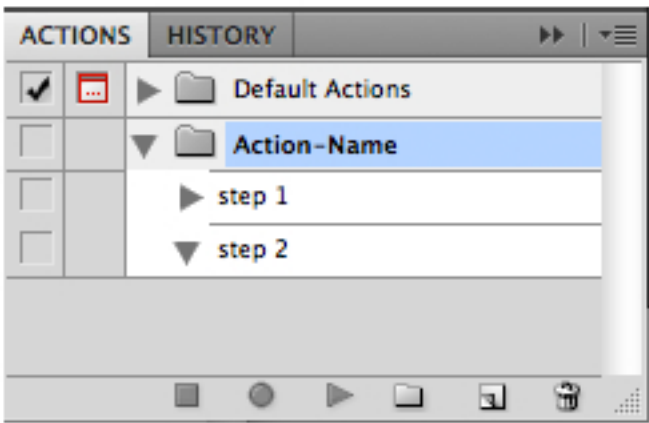

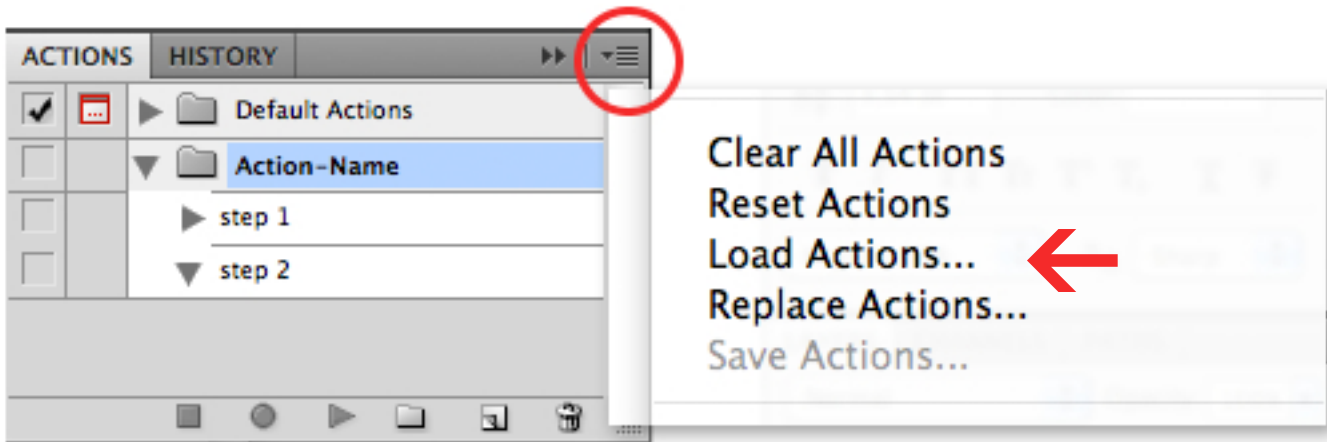

1) Unzip the file (.zip) in a folder of your choice on your computer.

2) Open Photoshop. Select the top menu Window > Actions. You will see the panel of actions open. See image below.

Actions Panel

3) At the top and right side of the Actions panel, click the arrow to open the options menu. Select Load Actions ... then open the file ActionName.atn. The file opens in the Actions panel.

*P.S. **ActionName.atn** should have another name within the file. Zip*

How to use:

1) Select the set of action on the panel. You should see two acions: Step 1 and Step 2.

2) Select the Action Step 1 and click on play selection. This will create a base file that will be the template. Create or paste your layout in this file.

3) Once your layout is created, select the Step 2 and click on play selection. This will render automatically. Within seconds the 3d layout will be ready.

4) You can edit the layers individually if desired. You can change color, adjust opacity etc.

Action Set

Step 1 (Action - Create Base Layout)

Step 2 (Action - Create Final Layout)
