Robotic Creation Kit – Be a mechanic – Read Me

First of all, thanks for buying one of my graphic files! I appreciate this and I would love to help you with your purchase. Underneath this intro text I will explain how to alter some of the parts of your purchase. I hope it will help you, and of course, good luck!

---

1. **Open any file** in Adobe Photoshop CS or higher.
2. If you want to use the separated file for a better overview, use the **robotic_seperated.psd** file.
3. In the file you'll notice all parts separated. They´re all nicely layered and named in folders.
4. Just **pick and drag the** wanted parts to create your own robot.
5. After you made your robot selection of the wanted parts, it´s time **to change the colors**.
6. The colors can be changed **by double clicking the color i**nside **the layers window**.
7. **Some** parts also need they´re layer effect color the be changed (only the lights for example).
8. *I´ve also included two pre-made psd files with fully customized robots by me.*
9. **Enjoy!**

Don't forget to give me a rating for the file & follow me! ☺ Thanksss!!
