1. Overview

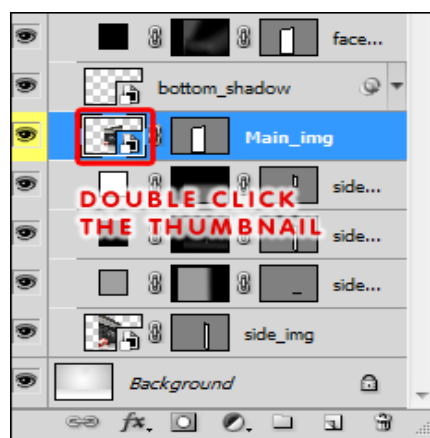

First of all, thanks for purchasing the SMART 3D PACKAGE BOX. You've just bought elegant 3D box elements that will enhance your graphic and web projects alike to make it further visually appealing.

The boxes provided with the pack are very easy to use and customize alike. The pack includes 2 different boxes and bonus elements that you can use in your projects. The instruction file will walk you through the implementation of the elements

2. Placing the image

It is really very easy to use the boxes provided. All you need to do is place an image of your choice and the boxes will update automatically. Follow the steps given below to use your images for the boxes:

- i) Open any of the PSD files provided.
- ii) Once the file is opened you'll find a layer group named **'Package_box'**.
- iii) Expand the layer group and you'll see a layer named **'Main_img'**. The layer is also colored yellow for easy locating.
- iv) Now double click the thumbnail icon of the layer and you'll be taken to a temporary file named **'Layer 4111.psb'**. This is a temporary file that is generated to update the smart object. *(Click okay if the alert box appears during the process)*

- v) Once in the temporary file, you'll see two layers. Double click the thumbnail of the layer named **'Main_img'** again and you'll be taken

to the actual temporary file **(Layer 6.psb)** which has the image needed to be replaced.

- vi) Once there, you'll see a guide which separates the image into the box face and the side. *(If the guide is hidden, goto view>show>guides to show it.)*
- vii) Place the image of your choice, save the image and then close it.
- viii) Once closed, you'll see that the previously created temporary file now has the updated reflection for your image. Now, save and close the file.
- ix) Once, both of the temporary files have been saved and closed, the main box will update itself to show your image.
- x) Repeat the steps to try different images.

3. Using the bonus elements

The bonus elements provided are very easy to use. Follow the steps below to customize it to your preferences.

- i) The bonus elements to be used have been place in the same files.
- ii) Expand the layer group of the bonus object you want to edit.
- iii) Once expanded, you'll see yellow text layer(s) which can be easily edited as usual.
- iv) To edit the color, double click the hue/saturation adjustment layer on the top of the same group and edit the color to your preference.

4. Font

The files included use a font that is a free alternative to **VAG Rounded**. You can download the alternative font from the following link if you don't have the font.

Folks-Light [<http://www.fontsquirrel.com/fonts/Folks-Light>]

That's it!! I hope you enjoyed using the SMART 3D PACKAGE BOX.

Thank you!!
