Thanks for buying my design.

Package content
There are three files in the downloadable zip folder, please check

1. **main.psd :** main photoshop file, photoshop cs4 is required to edit this file as it exploits several cs4 features
2. **softbox_quick_edit.atn :** photoshop action file, import it to your copy of photoshop. This file contains a set of actions to make your life comfortable editing the dvd_box.psd. later in this document there is a whole section about these actions
3. **softbox_help.pdf :** this help file / documentation

Font information
arial family

System font for both PC and MAC. No need to download or purchase anything.

Actions
There are several layers / smart objects in the main psd, so it would be hard to find one and edit its content. So I have recorded 5 actions in the action pack for some common tasks. You will find them after installing them into your copy of photoshop

- **dvd sticker :** run this action to open the dvd sticker smart object. After editing / pasting in your own art work, save and close the sticker.psb.
- **package top :** run this action to open the smart object for the top of the package. After editing / pasting in your own art work, save and close the front.psb.
- **package side :** run this action to open the smart object for the left side of the package. After editing / pasting in your own art work, save and close the side.psb.
- **package front :** run this action to open the smart object for the front side of the package. After editing / pasting in your own art work, save and close the front.psb.
- **manual cover:** run this action to open the manual smart object. After editing / pasting in your own art work, save and close the page.psb.

How to install the action pack?

1. Copy the softbox_quick_edit.atn to your photoshop actions folder.
For windows user It may be located at <installation drive>:\Documents and Settings\<user>\Application Data\Adobe\Adobe Photoshop CS4\Presets\Actions
2. Open photoshop
3. Make actions panel visible from window -> action, if it is already not visible
4. Click on the drop down on the top right of the actions panel and select load actions…
5. Browse to the actions folder and select the softbox_quick_edit.atn

6. All the actions mentioned above will be enlisted under 'softbox quick edit' actions group
