

First and foremost, thank you for your purchase!

The assets you've just purchased will have you on your way to a cool trifold brochure!

Purchasing and Downloading Images

All of the images used in this brochure can be purchased at istockphoto.com. I've listed the images below for your easy retrieval.

Fonts

The font used within the entire identity system is Sansation. Sansation can be downloaded for free by going to <http://www.dafont.com/sansation.font>

Assets

The only assets used with this template are the red circle graphic and the font Sansation. The color bars are simply boxes within the respective application. If you are working with the InDesign file you will notice that there is no "Fonts" folder. This is due to the fact that GraphicRiver does not want authors to include the fonts with their files. Again, simply follow the link above to download the font for free.

Depending upon which application you use to edit your materials will determine which folder you need to use. There are 3 folders...

InDesign– Inside this folder contains all the working files (minus the "Fonts" folder for each document.) Illustrator– Illustrator files with no external assets. Photoshop– Fully layered 300 dpi files.

Bleed

All files include a bleed or crop area. In Photoshop the bleed is marked by the "Bleed" layer.

Professional Printing

A few of the places I've used before for printing a range of jobs are listed below. Since each place has slightly different guidelines for what they accept you may need to do a nominal amount of work to meet a particular standard. I am in no way affiliated with any of the companies listed below.
