

**Hello!**

Thank you for purchasing the **PRO HDR PHOTO FX**.

This action has been tested and working on Photoshop CS4, CS5, CS6, CC - only in English version.

If you have problem with action or maybe if you have any questions, don't hesitate to contact me at [kontakt@pawlowskiart.com](mailto:kontakt@pawlowskiart.com)

**Before you run the action:**

1. Make sure that you are working in RGB 8 bits/Channel Mode.

Go to Image -> Mode -> Rgb Color and 8 Bits/Channel

2. Your photo must be a background..

Select your layer and go to Layer -> New -> Background from Layer

3. Your Photoshop must be in English..

If you do not have an English version of Photoshop you can use this method to change the language: <https://www.youtube.com/watch?v=7lz651eFHzw>

**How to install the action:**

Please, check the following video if you have problem with installing this action:

<https://www.youtube.com/watch?v=kaxjFuWkFRU>

**How it works?**

*Remember! First, turn on the main 'HDR' actions , then 'Color Actions' or 'Addons'!*

You can use these actions for each photo, but keep in mind that the actions may not work properly on low quality pictures. After switching the play button for a HDR v.1 action, you will can easily change sharpness ('SHARPNESS' group), hdr effects ('HDR LAYERS' group) or adjustment ('ADJUSTMENTS' group).

If you have a cut-out photo, you can use a glow action after using a main action.

Best Regards,

PawlowskiArt – [www.graphicriver.net/user/PawlowskiArt](http://www.graphicriver.net/user/PawlowskiArt)
