

PHOTO FRAME TEMPLATE

Thank you For Purching This Item

Everything should be pretty straight forward. I have tried to make the item as easy to use.

First you have to install the font. then open the file , full designs is layered

Photo Display Frame Templates

How to change image :

At First open . Go to layers option and select the Frame ,then click Frame drop down icon

then go to Right click>Replace image layer and double click. Open new Document .Here you add your image(Fule-place - select image and properly set up - save),-save(Ctle + s).

That,s it.If you want Black & white effects ,you will click or active Black & white layer.

After finishing all of your edit, just save the file (Ctrl+s)

Now it's ready to use.
