Photoshop Action *tutorial*

Hello, Thank you for your purchase! **Please don't forget to rate my item!**
Please read this article completely to learn how to use this action.
If you had questions, just put a comment on my item and I'll respond in max 48 hours.

Stage One: Open your photo in Photoshop.

To start, simply open your target photo in Photoshop from the File menu.
Please note that for the action to run correctly you'll need Adobe Photoshop **CS3 or higher**.

Stage Two: Make a new layer and name it " paint ".

Press Ctrl + Shift + N to make a new layer and name it exactly "paint".
Then, Paint the path over your photo. (Doesn't matter what color you use.)

Stage Three: Load and Play.

When you've brushed your path over the photo, Load the action in photoshop by double clicking on it and then press the play button from the actions palette.

If you don't have the Actions palette, you can get it by going to Window > Actions .
When you play the action, the instructions may come up and guide you through the process.

Tip: Additional Effects

When the action's done, you will have 10 additional effects to use on your final image.
Since not all of them are supposed to work on every photo, you may want to try all of them.

When you are done save your image by going to File > Save as .

Feel absolutely free to send your comments or any problems with the action on my item on GraphicRiver.net

Don't forget to rate!
Enjoy.
