INSTALL ACTION IN PHOTOSHOP
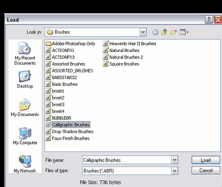

1. Double click on Action ATN , Brush ABR and Pattern PAT file to install in photoshop.
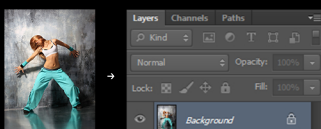

If you have problems loading the brush try this way

Press the triangle on the right of the word Brush and the Brush palette will open.
In the Brush palette click the triangle in the right upper corner and you will see a fall-out menu where you should select the item Load Brushes

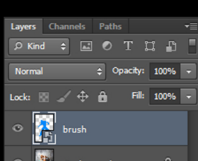

You will see the Load Brushes dialog box. Choose the brush preset you want from the list.

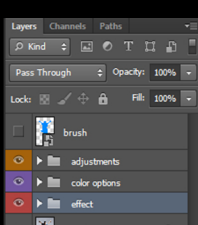

2. Place your photo in photoshop.

Create new layer name it brush and paint area, after finish with paint be sure your brush layer selected

Click Alt+F9 to open Action menu in photoshop

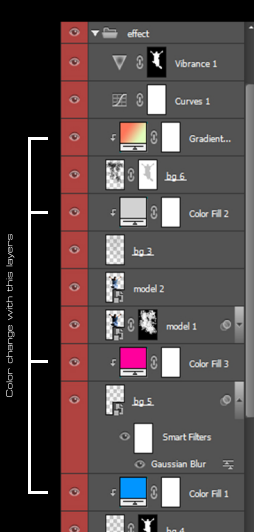

3. After action is finish your layers like this

Open adjustments folder to change options for brightness, saturation, sharpnes, lightning

In color options folder add more options for color: simply click eye icon

In effect folder you can play with layers for different effect, change colors, blending mode, opacity or filter effect

Double click on Pattern layer and easy change background pattern

Be sure your photoshop set to RGB color 8bits/channel, English version
