

## HTML5 for Beginners: Learn by Video

Create a Simple but State-of-the-Art Website

<b>Duration:</b>	2 hrs
<b>Value:</b>	\$34.99
<b>Available as:</b>	On-Demand Training

The advent of HTML5 has opened up new frontiers in the world of web design, and in this course you'll learn how to exploit the power of HTML5 to make the best-looking, smoothest-functioning, and easiest-to-use web pages possible. After getting an overview of HTML and CSS concepts, you'll work along with author and trainer Sally Cox to create an entire blog site from scratch. Starting with the concept, you'll proceed to build a wireframe and add text, images, a header, a nav bar, an interactive form, and even

multimedia content. Along the way you'll learn about the new tags in HTML5 and get lots of tips on web design, such as which graphic formats to use and the best way to save your graphics for the web. This Learn by Video title is published in partnership with Peachpit Press.
